Depok, West Java, Indonesia

IT Engineer (R&D) & Fullstack Developer experienced in building Web, Desktop, Mobile, and AI systems alongside on-site infrastructure setup.

Work Experiences

PT UMALO SEDIA TEKNO - **Depok, West Java, Indonesia** Oct 2025 - Sekarang

IT Engineer

A technology company specializing in smart IT solutions, integrated software ecosystems, and digital infrastructure transformation to enhance operational efficiency and security across industries.

- Researched, architected, and developed end-to-end software solutions within the Research & Development (R&D) Division focusing on Applied AI, cross-platform Desktop applications, and visual hardware integration.
- Engineered FaceLog, a real-time facial recognition attendance ecosystem (Python, Django REST API, OpenCV, FaceNet, React.js, PostgreSQL) integrated and deployed directly onto Interactive Flat Panel (IFP) hardware and Kiosk Scanners.
- Architected EduSphere, a 34+ module cross-platform desktop learning suite (Electron, React.js, Express.js, Socket.IO, & offline-ready SQLite) featuring video conferencing, real-time proctored exams, and classroom device control.
- Developed SnapStream (a multi-RTMP live streaming & FFmpeg recording studio) and executed the on-site Video Wall installation at UPN Surabaya, deploying SnapStream directly onto the live Video Wall system.

PT UMALO SEDIA TEKNO - **Depok, West Java, Indonesia** Agustus 2024 - Dec 2024

IT Engineer Intern

A technology company specializing in smart IT solutions, integrated software ecosystems, and digital infrastructure transformation to enhance operational efficiency and security across industries.

- Developed Compro AGS, a 27-screen corporate portal and B2B procurement system built with Laravel, MySQL, and Tailwind CSS managing Quotations, Negotiations, Purchase Orders (PO), Proforma/Final Invoices, Service Ticketing, and SEO Meta CMS.
- Built two specialized laboratory and industrial equipment e-commerce platforms (Labverse & Labtek) using Laravel and MySQL, featuring filtered customer storefronts, Flash/Big Sales campaigns, payment verification, shipping carrier settings, and admin revenue analytics.
- Participated directly on-site in the installation, configuration, and testing of the Paperless Conference System infrastructure at UPN Surabaya.

Education Level

Institut Teknologi Del - **Laguboti** Jul 2022 - Sep 2025

Diploma in Information Technology, 3.41/4.00

- Final Year Capstone Project: Designed and engineered DairyTrack, a cross-platform cattle health and reproduction monitoring ecosystem synchronizing a React.js Web Dashboard and a Flutter Mobile App via a Django REST API & PostgreSQL backend (23 functional screens).
- Graduated on schedule with a Diploma in Information Technology (GPA: 3.41/4.00) while specializing in end-to-end software engineering and completing an industrial internship.

Organisational Experience

BEM Institut Teknologi Del - **Toba, North Sumatra, Indonesia** Aug 2023 - Aug 2024

Member of Sports Department

The official student executive body of Institut Teknologi Del responsible for leading student governance, campus-wide events, and non-academic development programs.

- Organized KM CUP, a major campus-wide sports tournament uniting faculty, staff, and students across departments.
- Coordinated on-campus and off-campus sports programs, match schedules, and athletic delegations representing the institute.

KPU (General Election Commission) - **Institut Teknologi Del** May 2024 - Jun 2024

Chairman

An independent student commission at Institut Teknologi Del mandated to organize fair, transparent, and democratic campus-wide student executive elections.

- Led the organization and execution of student elections, ensuring a fair and transparent process.
- Developed and implemented strategies to increase student participation and awareness in the election process.
- Coordinated with various departments and student bodies to facilitate smooth election procedures.

UKM Badminton Institut Teknologi Del - **Institut Teknologi Del** Jan 2024 - Jan 2025

Chairman

The official campus badminton student activity unit at Institut Teknologi Del focused on nurturing athletic talent, regular training, and inter-university tournament participation.

- Led the Badminton Student Activity Unit (UKM), overseeing regular training schedules, member development, and club operations.
- Organized internal/external tournaments and built collaborative sparring partnerships with local badminton clubs.
